

BAKTI AULIA ZIKRI

IT Business Analyst

Bandung | +62 81349136713 | baktiauliaz@gmail.com | [Linkedin](#) | [Github](#) | [Portofolio](#)

Summary

Information Technology professional with hands-on experience spanning Business Analysis, System Quality Assurance, and Application Development. Proven track record in gathering business requirements, drafting Business Requirement Documents (BRD), modeling complex operational workflows, and bridging technical development teams with corporate stakeholders to deliver efficient software solutions. Experienced in monitoring project lifecycles, managing system implementations within healthcare IT environments, and executing User Acceptance Testing (UAT) to ensure core deliverables align with strategic business objectives.

Professional Experience

PT METEOR INOVASI DIGITAL February 2023 – June 2023

IT Business Analyst & Product Management Intern

- Elicited and gathered end-user requirements across multiple departments to construct comprehensive Business Requirement Documents (BRD) defining project scopes.
- Analyzed and decomposed high-level business needs into actionable functional specifications to guide engineering and technical development teams.
- Conducted product research and contributed to defining product strategies, roadmaps, and feature specification documents to solve operational inefficiencies.
- Presented BRD workflows and mockups to key stakeholders and development teams to ensure consistent alignment on project objectives.
- Sliced designs and built web components using React.js and Node.js (Express), validating integrations via Postman based on business test scenarios.

Santosa Hospital Bandung Central August 2025 – Present

System Quality Assurance Analyst

- Analyzed healthcare operational workflows and system requirements to monitor and improve overall software product quality.
- Documented and maintained structured functional system requirements, comprehensive quality reports, and critical project notes.
- Facilitated seamless coordination and collaboration between developers, IT support, and multi-department internal end-users during crucial User Acceptance Testing (UAT) cycles.
- Developed and executed comprehensive test plans and detailed test scenarios to mitigate risks and identify system bugs at early deployment stages.
- Supported post-deployment activities and continuous system maintenance to safeguard data security and performance across hospital units.

PT TRASINDO DATA PERKASA (RSUD Kota Subang) July 2024 – April 2025

IT Programmer / Full Stack Developer (SIMRS Vendor)

- Coordinated directly with various hospital clinical and administrative units to analyze, map, and implement functional system requirements for the SIMRS application.
- Managed the analysis, bug fixing, and functional expansion of vital hospital operational modules including Pharmacy, Admission, and Logistics.
- Customized complex hospital reporting outputs, registration receipts, patient labels, and Electronic Medical Records (EMR) utilizing Laravel Blade.
- Executed efficient database queries and handled robust backend data integration using Laravel to ensure data consistency.
- Developed clean, modular user-facing components using Vue.js frameworks (Vuero, PrimeVue, Bulma) to optimize daily staff workflows.

PT SILI ONA MANUIA May 2025 – August 2025

Programmer

- Developed corporate landing pages and optimized client-side interactions to ensure a smooth, high-converting user experience.
- Maintained internal company devices and troubleshooted regional networking/system infrastructure to preserve operational uptime.

Skills

-
- **Functional Skills:** Business & System Analysis, Requirement Gathering, Documentation (BRD/FRD), Workflow Modeling, Product Roadmap Strategy, Project Lifecycle Monitoring, Stakeholder Coordination, User Acceptance Testing (UAT).
 - **Technical & Frameworks:** HTML, CSS, JavaScript, PHP, Laravel, React.js, Vue.js, Node.js (Express), JQuery, AJAX.
 - **Databases & Backend:** MySQL, PostgreSQL, MongoDB, SQL Server, REST APIs.
 - **Tools & Platforms:** Microsoft Project, MS Office (Word, Excel, PowerPoint), Figma, Jira, GitHub, Postman, Selenium, Katalon, Appium.

Education

Politeknik Negeri Padang September 2020 – December 2023

D3 Manajemen Informatika (IPK: 3.39)

- **Booking Service System (Final Project):** Analyzed, modeled, and developed system workflows, database schemas, and core CRUD business logic using Laravel and MySQL.
- **Employee Management System:** Built an internal organizational data management and automated reporting system using native PHP and Bootstrap.

Certifications & Training`

- **Dasar Manajemen Proyek – Dicoding Indonesia**
- **FGA DTS Kominfo 2024** – Mobile App Development with React Native
- **DBS Foundation Coding Camp 2024** – Web & JavaScript Programming
- **AWS Back End Academy / Cloud Practitioner Essentials** – Cloud Fundamentals & Back-End Development
